1 Marine-derived Peptides: Development and Health Prospects 1
Se-Kwon Kim and Isuru Wijesekara
1.1 Introduction 1
1.2 Development of Marine Peptides 1
1.3 Health Benefits of Marine Peptides 2
1.4 Conclusion 3
References 3

2 Bioactive Proteins and Peptides from Macroalgae, Fish, Shellfish and
Marine Processing Waste 5
Pádraigín A. Harnedy and Richard J. FitzGerald
2.1 Introduction 5
2.2 Macroalgal, Fish and Shellfish Proteins: Potential Sources of
Bioactive Hydrolysates and Peptides 5
2.2.1 Macroalgal Proteins 6
2.2.2 Fish and Shellfish Proteins 7
2.3 Enzymatic Hydrolysis of Macroalgal, Fish and Shellfish Processing
Waste Proteins: Bioactive Protein Hydrolysates and Peptides 8
2.3.1 In Vitro and In Vivo Cardioprotective Activity 10
2.3.2 Oxidative Stress 16
2.3.3 Other Biofunctionalities 18
2.4 Endogenous Bioactive Peptides from Macroalgae, Fish and Shellfish 22
2.5 Bioactive Proteins from Macroalgae, Fish and Shellfish 22
2.6 Commercial Products Containing Marine-Derived Bioactive Protein
Hydrolysates and Peptides 24
2.7 Conclusion 27

3 Lectins with Varying Specificity and Biological Activity from
Marine Bivalves 41
Bishnu Pada Chatterjee and Mausumi Adhya
3.1 Introduction 41
3.1.1 Bivalves 41
3.1.1.1 Mussels 41
3.1.1.2 Oysters 42
3.1.1.3 Clams 43
4 Digestive Enzymes from Marine Sources 69
Juan Antonio, Noriega Rodríguez, Ramiro Baeza Jiménez and Hugo Sergio García

4.1 Introduction 69
4.2 Biodiversity and Availability 70
4.3 Marine Biocatalysts 70
4.3.1 Salt and pH Tolerance 72
4.3.2 Barophilicity 73
4.3.3 Cold Adaptivity 73
4.4 Digestive Enzymes 73
4.4.1 Digestive Proteases 73
4.4.1.1 Acid/Aspartyl Proteases 74
4.4.1.2 Serine Proteases 75
4.4.1.3 Cysteine or Thiol Proteases 77
4.4.1.4 Metalloproteinases 78
4.5 Lipases 78
4.5.1 Phospholipases 79
4.5.2 Chitinolytic Enzymes 80
4.5.3 Transglutaminase 80
4.6 Industrial Applications 81

5 Kamaboko Proteins as a Potential Source of Bioactive Substances 91
Takeshi Nagai, Yasuhiro Tanoue, Norihsa Kai and Nobutaka Suzuki

5.1 Introduction 91
5.2 Creation of Healthier and Safer Foods 94
5.3 Enzymatic Modification of Food Proteins 95
5.4 Kamaboko 95
5.5 Chemical Properties of Kamaboko 98
5.6 Expression of Health the Function of Kamaboko Proteins 98
5.7 Antioxidative Activities of Kamaboko Proteins 100
5.8 Angiotensin I-Converting Enzyme-Inhibitory Activities of Kamaboko Proteins 104

### Contents

8 Ability of Diverse Marine Invertebrate Lectins to Regulate Cell Functions

Yasuhiro Ozeki, Sarkar M. A. Kawsar, Yuki Fujii, Yukiko Ogawa, Shigeki Sugawara, Imtiaj Hasan, Yasuhiro Koide, Hidetaro Yasumitsu and Robert A. Kanaly

8.1 Introduction

8.2 Does a Feather Star Lectin have a Role in Regenerative Biology?

8.2.1 The First Evidence of Lectin in the Feather Star (Phylum Echinodermata, Class Crinoidea)

8.2.2 Type-2 N-Acetyllactosamine Recognition of Oxyl Identified by Frontal-affinity Chromatography Technology

8.2.3 Biomedical Aspects of OXYL for Regenerative Biology

8.3 A Novel Lectin from the Mediterranean Mussel Induces Apoptosis and Glycosphingolipid Interaction

8.3.1 Progress in Mussel Genome Databases

8.3.2 Shorter Carbohydrate-binding Motif Candidate Found in $\alpha$-Galactose-binding Lectin in Mussel

8.3.3 Globotriaosyl Ceramide (Gb3)-dependent Cytotoxicity of the Mussel Lectin

8.4 Downregulation of the Gene Expression of an ABC Transporter by a Novel Lectin-glycosphingolipid Pathway Involving a Suel-type Lectin Domain

8.4.1 The D-galactoside/L-rhamnose-binding SUEL-type Lectin Family

8.4.2 Novel Downregulation of Gene Expression of an ABC Transporter by the Lectin—Glycosphingolipid Pathway

8.5 Perspectives on Studies of Invertebrate Lectins and Their Diverse Properties

10 Production of Lactobacilli Proteinases for the Manufacture of Bioactive Peptides: Part I—Upstream Processes 207
Dominic Agyei, Ravichandra Potumarthi and Michael K. Danquah

10.1 Introduction: Bioactive Peptides—Production and Functionalities 207
10.2 Lactobacilli Metabolism 209
10.3 The Proteolytic System of The Lactobacilli 209
10.4 Sources of Proteases and Advantages of Microbial Proteases 211
10.5 Marine Lactobacilli 212
10.6 Proteinase Production Requirements 212
10.6.1 Cell-Line Acquisition 212
10.6.2 Production (Growth) Media Selection 214
10.6.2.1 Carbon Sources 214
10.6.2.2 Nitrogen Sources 215
10.6.2.3 Carbon/Nitrogen Ratio 216
10.6.2.4 Metal-ion Requirement 216
10.6.3 Process Optimisation for Growth and Proteinase Production 217
10.6.3.1 Culture pH 217
10.6.3.2 Incubation Temperature 217
10.6.3.3 Gaseous Regime (Aeration) 218
10.6.3.4 Agitation Speed 219
10.6.3.5 Inoculum Conditions 220
10.6.3.6 Time Course for Proteinase Production 220
10.7 Effect of Fermentation Modes on Cell Growth and Proteinase Production 220
10.8 Cell Systems for Proteinase Production 222
10.9 Statistical Methods and Mathematical Models 222
10.10 Conclusion 223

11 Production of Lactobacilli Proteinases for the Manufacture of Bioactive Peptides: Part II—Downstream Processes 231
Dominic Agyei, Ravichandra Potumarthi and Michael K. Danquah

11.1 Introduction: Cell Recovery 231
11.2 Isolation: Proteinase-extraction Methodologies 231
11.2.1 Ca$^{2+}$-Free Buffers 232
11.2.2 Chaotropic Agents 234
11.2.2.1 Urea 234
11.2.2.2 Lithium Chloride 234
11.2.2.3 Guanidine Hydrochloride 235
11.2.4 Glycine 235
11.2.3 Low-Concentration Detergent 235
11.2.3.1 Sodium Dodecyl Sulfate 235
11.2.3.2 Triton X-100, CHAPS and DTT 235
11.2.4 Use of Enzymes (Muramidases) 236
11.2.5 Use of a Cocktail of Extractant 236
11.2.6 Factors Affecting Enzyme Extraction 236
11.2.6.1 Cell Lyses 236
11.2.6.2 Incubation Time, Temperature and pH 236
11.3 Purification of Enzymes 237
11.3.1 High-Performance Tangential Flow Filtration 239
11.3.2 High-Performance Liquid Chromatography 240
11.3.3 Ion-exchange Chromatography 240
11.3.4 Size-exclusion Chromatography 241
11.3.5 Hydrophobic-interaction Chromatography 241
11.3.6 Reversed-phase (rHPLC) 241
11.3.7 Affinity Chromatography (AC) 242
11.3.8 Methacrylate Monoliths as Stationary Phase in Chromatography 243
11.3.9 Expanded-bed Adsorption 243
11.4 Enzyme Concentration and Storage 244
11.5 Characterisation of Proteinase 244
11.5.1 Enzyme-activity Determination 244
11.5.1.1 Use of Casein in the Estimation of Proteinase Activity 244
11.5.2 Proteinase Kinetic Parameters 245
11.5.3 Optimum Conditions for Proteinase Activity 245
11.5.4 Molecular-mass Estimation, Metal-ion Inducers and Inhibitors 246
11.5.5 Substrate Specificity 246
11.6 Solvent and Enzyme Engineering for Enhanced Stability and Specificity 247
11.7 Conclusion 247

29 Applications of Marine-derived Peptides and Proteins in the Food Industry 545
D. M. Dilan Rasika, C. Senaka Ranadheera and Janak K. Vidanarachchi

29.1 Introduction 545
29.2 Marine-derived Proteins and Peptides Used in the Food Industry 546
   29.2.1 Antioxidants 546
   29.2.2 Antifreeze Proteins 547
   29.2.3 Antimicrobials 549
   29.2.4 Bioactive Peptides 550
   29.2.5 Enzymes 552
   29.2.6 Proteases/Proteinases/Protein-degrading Enzymes 552
   29.2.7 Lipid-degrading Enzymes 552
   29.2.8 Carbohydrate-transforming Enzymes 554
   29.2.9 Miscellaneous-type enzymes 554
29.3 Collagen and Gelatin 554
29.4 Extraction and Isolation of Marine-derived Proteins and Peptides 556
   29.4.1 Extraction of Antioxidants 556
   29.4.2 Extraction of Antifreeze Proteins 557
   29.4.3 Extraction of Antimicrobials 558
   29.4.4 Extraction and Isolation of Bioactive Peptides 558
   29.4.5 Extraction of Enzymes 559
   29.4.6 Extraction of Collagen and Gelatin 559
29.5 Food-related Applications of Marine-derived Proteins and Peptides 560
   29.5.1 Food Applications of Antioxidants 560
   29.5.2 Food Applications of AFPS 562
      29.5.2.1 Use of AFPs in the Cryopreservation of Fruits and Vegetables 562
Contents

29.5.2.2 Use of AFPs in the Meat Industry 563
29.5.2.3 Use of AFPs in Surimi Production 563
29.5.2.4 Use of AFPs in Ice-cream Manufacture 564
29.5.2.5 Use of AFPs in Aquaculture 564

29.5.3 Food Applications of Antimicrobials 565

29.5.4 Food Applications of BAPS 565
29.5.4.1 BAPs with Antihypertensive Effects 565
29.5.4.2 Bioactive Peptides with Beneficial Effects on the Gastrointestinal Tract 566
29.5.4.3 Bioactive Peptides with Anti-anxiety Effects 566

29.5.5 Food Applications of Marine-derived Enzymes 567
29.5.5.1 Use of Marine-derived Enzymes for the Extraction of Collagen from Fish-processing Byproducts 567
29.5.5.2 Use of Marine-derived Enzymes as Rennet Substitutes in Cheese Manufacture 567
29.5.5.3 Use of Marine-derived Enzymes for the Removal of the Oxidized Flavor of Milk 568
29.5.5.4 Use of Marine-derived Enzymes for the Production of Ripened Fish and Fish Sauce 568
29.5.5.5 Use of Marine-derived Enzymes for the Production of Fish-protein Hydrolysate 569
29.5.5.6 Use of Marine-derived Enzymes to Improve the Thickness and Gelling Ability of Surimi 570
29.5.5.7 Use of Marine-derived Enzymes for the Enrichment of PUFAs in Fish Oil 571
29.5.5.8 Use of Marine-derived Enzymes for the Deskinning and Descaling of Fish and Squid 572
29.5.5.9 Potential Food Applications of Marine-derived Lipases 572

29.5.6 Food Applications of Marine-derived Collagen and Gelatin 572
29.5.6.1 Edible Films and Coatings from Marine-derived Gelatin 573
29.5.6.2 Marine-derived Gelatin as a Gelling Agent in Food Products 575

29.6 Conclusion 576

30 Processing and Industrial Aspects of Fish-scale Collagen: A Biomaterials Perspective 589
Santanu Dhara, Pallab Datta, Pallabi Pal and Soumi Dey Sarkar

30.1 Introduction 589
30.2 Structure and Composition of Collagen 589
30.3 Synthesis of Collagen 590
30.4 Type-I Collagen 591
30.4.1 Sources 591
30.4.2 Advantages and Disadvantages 592
  30.4.2.1 Advantages 592
  30.4.2.2 Disadvantages 592
30.4.3 Biomedical Applications 592
30.5 Recombinant Collagen 593
30.6 Fish’s Potential as an Alternative Source of Collagen 594
  30.6.1 Isolation of Collagen From Various Parts of the Fish 594
    30.6.1.1 Scale 594
    30.6.1.2 Skin and Muscle 596
    30.6.1.3 Bone 597
    30.6.1.4 Fin 597
    30.6.1.5 Swim Bladder 597
    30.6.1.6 Stomach 597
    30.6.1.7 Variations from Usual Processes in the Isolation of Fish Collagen 598
  30.6.2 Comparative Characteristics of Fish Scale-derived Collagen 600
    30.6.2.1 Yield 600
    30.6.2.2 Amino Acid Analysis 600
    30.6.2.3 SDS-PAGE Analysis 607
    30.6.2.4 Subunit Composition 608
    30.6.2.5 Circular Dichroism 609
    30.6.2.6 Thermal Stability 610
    30.6.2.7 FTIR Spectroscopic Study 612
30.7 Emerging Applications of Type-I Collagen 613
  30.7.1 Type-I Collagen for Wound Healing and Skin Tissue Engineering 613
  30.7.2 Commercially Available Collagen-based Wound Dressings/Skin Substitutes 614
30.8 Conclusion 621
