About the Authors

Jennifer Smith is a designer, educator, and author. She has authored more than 20 books on digital design and creative software tools. She provides consulting and training services across a wide range of industries, including working with software developers, magazine publishers, catalog and online retailers, as well as some of the biggest names in fashion, apparel, and footwear design. When not writing and consulting you'll often find her delivering professional development workshops for colleges and universities.

Jennifer also works extensively in the field of web usability and user experience design. Jennifer works alongside application developers and web developers to create engaging and authentic experiences for users on mobile devices, tablets, and traditional computers. She has twice been named a Most Valuable Professional by Microsoft for her work in user experience (UX), user interface (UI) design fields, and her leadership in educating users on how to integrate design and development skills.

Jennifer Smith's books on Photoshop, Illustrator, and the Creative Suite tools include the *Photoshop Digital Classroom*, the *Illustrator Digital Classroom*, and the *Adobe Creative Suite for Dummies*, all published by Wiley. She has also authored *Wireframing and Prototyping with Expression Blend & Sketchflow*.

Jennifer is the cofounder of the American Graphics Institute (AGI). You can find her blog and contact her at JenniferSmith.com and follow her on Twitter @jsmithers.

The **AGI Creative Team** is composed of Adobe Certified Experts and Instructors from AGI. The AGI Creative Team has authored more than 25 Digital Classroom books and has created many of Adobe's official training guides. The AGI Creative Team works with many of the world's most prominent companies, helping them use creative software to communicate more effectively and creatively. They work with design, creative, and marketing teams around the world, delivering private customized training programs, while also teaching regularly scheduled classes at AGI's locations. The AGI Creative Team is available for professional development sessions at companies, schools, and universities. Get more information at agittraining.com.

Acknowledgments

Thanks to our many friends at Adobe Systems, Inc. who made this book possible and assisted with questions and feedback during the writing process. To the many clients of AGI who have helped us better understand how they use this software and provided us with many of the tips and suggestions found in this book. A special thanks to the instructional team at AGI for their input and assistance in the review process and for making this book such a team effort.

Thanks to iStockPhoto (*iStockPhoto.com*) for their permission to use exclusive photographers for images throughout the *Adobe Creative Cloud Design Tools Digital Classroom* book.

Bridge Lesson 1: Organizing and Managing Your Files with Adobe Bridge

Starting up	1
What is Adobe Bridge?	2
Navigating through Bridge	2
Using folders in Adobe Bridge	4
Making a Favorite	7
Creating and locating metadata	9
Using keywords	11
Creating a Metadata Template	12
Opening a file from Adobe Bridge	14
Searching for files using Adobe Bridge	14
Searching by name or keyword	15
Using the Filter panel	16
Saving a Collection	17
Automation tools in Adobe Bridge	19
Batch renaming your files	19
Additional Photoshop Tools	21
Changing the view	22

Self study.....	23
Review	23

Photoshop Lesson 1: Navigating Photoshop CC: Workspace, Tools, and Panels

Starting up	25
Opening an existing document in Mini Bridge	26
Discovering the Tools panel	29
Selection, Cropping, and Measuring Tools	29
Retouching and Painting Tools.....	30
Drawing and Type Tools.....	30
Navigation Tools	30
Accessing tools and their options	31
Using panels.....	35
Putting the panel system to use.....	36
Choosing other panels.....	38
Expanding and collapsing your panels.....	39
Customizing your panels	40
Hidden tools.....	42
Navigating the image area.....	45
Using the Zoom tool.....	45
Using the Hand tool	47
Tabbed windows.....	48
Maximizing productivity with screen modes.....	49
Self study.....	51
Review	51

Photoshop Lesson 2: Introduction to Photoshop CC

Starting up	53
Opening a file	54
Saving the work file.....	54
Cropping an image.....	55
Quick image correction	59
Increasing contrast using curves	60
Adjusting the neutral	61
Using the improved Smart Sharpen feature	62
A look back in History.....	64

Saving files	65
Understanding file formats	65
Choosing a file format	67
Saving a JPEG file	67
Saving for print	67
Changing the color settings	67
Adjusting image size	69
Saving a Photoshop PDF file	71
Self study	72
Review	72

Photoshop Lesson 3: Making Selective Changes in Photoshop CC

Starting up	73
The importance of a good selection	74
Using the Marquee tools	74
Creating a square selection	78
Creating a selection from a center point	80
Changing a selection into a layer	82
Working with the Magic Wand tool	83
The Lasso tool	85
Adding to and subtracting from selections	86
Deleting from the selection	86
Adding to the selection	88
Saving a selection	89
Feathering the selection	89
Using the Quick Selection tool	91
Making difficult selections with the Refine Edge feature	92
Using Quick Mask	94
Saving selections	97
Copying and pasting a selection	99
Using the Pen tool for selections	100
Using the Pen tool to select an area of an image	103
More Pen tool selection techniques	105
Converting a path to a selection	109
Self study	110
Review	110

Photoshop Lesson 4: Painting and Retouching

Starting up	111
Setting up your color settings.....	112
Color primer	112
Understanding color gamut.....	112
The RGB color model	113
The CMYK color model	113
Working in the RGB mode.....	114
Editing color settings.....	115
Selecting colors	118
Starting to paint.....	120
Using the Color panel	121
Using the Brush tool	122
Changing opacity.....	124
Save time—learn the shortcuts	125
Using the Brush Presets	126
Using the Airbrush feature	128
Creating a Border using the Bristle brushes.....	130
Applying color to an image.....	131
Changing blending modes	133
The Eyedropper tool.....	134
Retouching images	137
Using the Clone Stamp tool	137
Repairing fold lines	139
The History panel.....	141
The Spot Healing Brush	142
The Healing Brush.....	142
Using the Patch tool	144
Using the Clone Source panel	145
Cloning from another source	148
Self study.....	150
Review	150

Photoshop Lesson 5: Color Correcting an Image

Starting up	151
Choosing your color settings.....	152
Opening the file.....	153
Why you should work in RGB	154
Reading a histogram	155
Making the Curve adjustment.....	156
Defining the highlight and shadow	158
Locating the White and Black Point	159
Inputting the white and black point values.....	159
Adjusting the midtones	165
Setting the neutral.....	168
Sharpening your image	171
Comparing your image with the original	173
Taking care of red eye.....	174
Using the Camera Raw plug-in.....	175
Using Camera Raw controls.....	179
Saving a DNG file	180
Reopening a DNG file	181
Self study.....	182
Review	183

Photoshop Lesson 6: Introduction to Photoshop Layers

Starting up	185
Discovering layers	186
Getting a handle on layers.....	186
Creating a new blank file	186
Naming your layer.....	188
Selecting layers.....	191
Tips for selecting layers	191
Moving layers	193
Changing the visibility of a layer.....	194
Using masks in a layer.....	194
Preserve transparency	196
Creating a composition.....	200
Moving images in from other documents	200

Creating a layer mask	202
Editing the layer mask	204
Cloning layers	206
Aligning and distributing layers	207
Applying filters to layers	208
Creating a type layer	209
Applying a layer style	212
Creating a clipping mask	213
Filtering your layers	215
Self study	216
Review	216

Dreamweaver Lesson 1: Dreamweaver CC Jumpstart

Starting up	217
What is Dreamweaver?	218
Design and layout tools	218
Site management and File Transfer Protocol	219
Coding environment and text editor	219
Mobile design and development features	220
Who uses Dreamweaver?	221
Dreamweaver's workspace features	221
Live View and Live Code	224
CSS Inspection and the Enable/Disable feature	224
Related files	225
Code Navigator	226
Photoshop smart objects	227
Support for Content Management Systems	227
HTML5, CSS3, and PHP code hinting	228
HTML and CSS Starter Pages	228
Subversion	228
Business Catalyst integration	229
How websites work	229
A simple flow chart	229
Domain names and IP addresses	230
Servers and web hosts	230
The role of web browsers	230

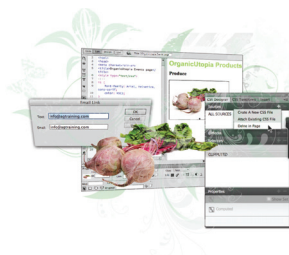

An introduction to HTML	230
Tag structure and attributes.....	231
The structure of an HTML document	233
Placing images in HTML.....	233
Colors in HTML.....	235
Case sensitivity and whitespace rules	236
Element hierarchy	238
HTML5.....	238
Explorations in code.....	238
A look at the Welcome Screen.....	239
Creating, opening, and saving documents.....	240
Creating new documents.....	240
Self study.....	242
Review	242

Dreamweaver Lesson 2: Setting Up a New Site

Starting up	243
Creating a new site.....	244
Advanced site-creation options.....	247
Adding pages	249
Saving a page to your site.....	252
Defining page properties.....	253
Work views	259
A deeper look into the Files panel	261
Viewing local files	262
Selecting and editing files	262
Self study.....	264
Review	264

Dreamweaver Lesson 3: Adding Text and Images

Starting up	265
Typography and images on the Web	266
Adding text	266
An introduction to styles	272
Previewing pages in a web browser	277
Understanding hyperlinks	279

Creating hyperlinks	280
Relative versus absolute hyperlinks	282
Linking to an e-mail address	284
Creating lists	284
Using the Text Insert panel	286
Inserting images	288
Image resolution	288
Image formats	288
Creating a simple gallery page	289
Linking images	292
Editing images	293
Adjusting brightness and contrast	293
Optimizing images	294
Updating images	295
Self study	296
Review	296

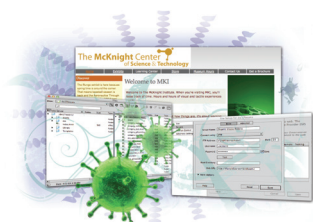

Dreamweaver Lesson 4: Styling Your Pages with CSS

Starting up	297
What are Cascading Style Sheets?	298
CSS replaces inefficient HTML styling	299
The benefits of CSS styling	300
How do you create CSS rules in Dreamweaver?	302
Understanding Style Sheets	306
Understanding why they're called Cascading	309
Creating and modifying styles	310
Creating a class style with the CSS Designer panel	313
Creating and modifying styles	316
Advanced text formatting with CSS	319
Fine-tuning page appearance with contextual and pseudo-class selectors	322
Div tags and CSS IDs	325
Internal versus external style sheets	327
Attaching an external style sheet to your page	329
Modifying attached style sheets	330
Creating a new .css file (external style sheet)	332

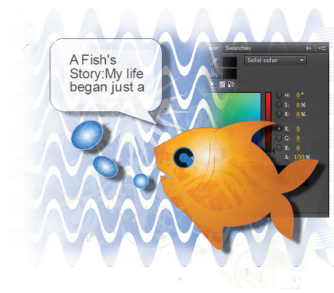

Self study.....	334
Review	334

Dreamweaver Lesson 5: Managing your Website: Reports, Optimization, and Maintenance

Starting up	335
Working with the Files panel.....	336
Creating a remote connection.....	336
Viewing files on a remote web server	340
Transferring files to and from a remote server with Get and Put	341
Using Check In/Check Out and Design Notes.....	343
Check In and Check Out.....	343
Checking files in and out	345
Using Design Notes	346
Sharing Design Notes	347
Displaying Design Notes in the Files panel.....	348
Testing site integrity.....	349
Checking links sitewide	349
Generating site reports.....	351
Understanding report results.....	353
Addressing a listed item	354
Optimizing pages for launch.....	355
Search engine visibility and Search Engine Optimization	355
Titling your documents with the <title> tag	355
Adding meta keywords and descriptions.....	358
Launching your site.....	359
Site launch checklist.....	359
Uploading your site	360
Getting help	361
Suggested next steps.....	362
Website design resources	363
Self study.....	364
Review	364

Flash Lesson 1: Getting Started with the Drawing Tools

Starting up	365
Drawing in Flash	366
Using the Merge Drawing mode	366
Creating artwork in Merged Drawing mode.....	367
Working with Drawing objects.....	369
Putting it all together	372
Using the Line tool	374
Using the Pen tool.....	377
Using the Add and Delete Anchor Point tools.....	379
Using the Combine Objects menu.....	381
Using the Primitive tools (Smart Shapes).....	384
Using the Oval Primitive tool.....	384
The Rectangle Primitive tool.....	387
Adding text to your artwork	390
Adding filters.....	392
Working with colors	394
Getting set up.....	394
Creating gradients.....	395
Using opacity with gradient colors	397
Creating custom colors.....	398
Saving a custom color set	398
Organizing and layering graphics.....	399
Working with layers.....	399
Arranging, locking, and hiding layers.....	401
Creating layer folders	402
Transforming graphics.....	404
The Transform menu and Free Transform tool.....	404
The Transform panel.....	407
Transforming gradients	408
Self study.....	410
Review	410

Flash Lesson 2: Creating Basic Animation

Starting up	411
Introducing keyframes and the Timeline	412
Layers.....	412
Frames and keyframes.....	412
Building animation: enter the tween	416
Tween layers and automatic keyframing.....	416
Tweening multiple objects.....	420
Previewing animation with Test Movie	422
Moving and transforming tween paths.....	423
Incorporating color effects and scaling.....	424
Tweening rotation	426
Controlling animation paths	428
Where did Motion Guide layers go?	430
What happens to my existing Flash files that use Motion Guide layers?	430
How do I create a motion guide if I still want to?	431
Morphing graphics and colors with shape tweens.....	431
Shape tween basics.....	431
Legacy techniques: creating classic tweens.....	435
Classic tween rules	438
Adding color effects and scaling to a classic tween	438
(Re)creating motion guides for classic tweens.....	439
Troubleshooting Motion Guides.....	441
Adjusting animation with onion skinning	442
Self study.....	444
Review	444

Flash Lesson 3: Delivering Your Final Movie

Starting up	445
The publishing process.....	446
Publishing to the Web	446
Customizing the Publish settings	447
Publishing for the Desktop with Adobe AIR.....	453
About Digital Certificates.....	458
Installing your new AIR application	458

Publishing for mobile devices	460
Publishing for iOS.....	460
Publishing for Android OS.....	462
Exporting PNG sequence	465
An overview of FTP	467
Self study.....	468
Review	468

Fireworks Lesson 1: Adobe Fireworks Jumpstart

Starting up	469
About Fireworks.....	470
Working with vector and bitmap objects.....	470
Optimizing graphics interactive	470
Optimizing and exporting graphics.....	470
Website and mobile application prototyping	470
Vector and bitmap graphics.....	470
About vector graphics.....	470
About bitmap graphics.....	471
The startup screen	472
Creating a new Fireworks document	473
Workspace basics.....	474
Fireworks workspace overview	474
Other Fireworks panels.....	476
Working with bitmaps	476
Creating bitmaps	476
Importing a bitmap.....	477
Cropping a bitmap	478
Applying a filter	479
Working with vector objects.....	480
Drawing and editing basic shapes.....	480
Drawing a rectangle.....	480
Resizing a rectangle	481
Auto Shapes	482
The Auto Shape tools	482

Working with text	483
Creating and moving text blocks.....	483
Formatting and editing text.....	484
Applying color	485
Applying a sampled color.....	485
Applying a swatch color to text.....	485
Using the Color Mixer	486
Using Layers	486
The Layers panel.....	486
Activating a layer	487
Organizing layers	488
Naming layer objects.....	488
Moving a layer object.....	488
Protecting layer objects.....	489
Showing or hiding objects and layers.....	489
Merging objects in the Layers panel.....	490
Deleting a layer object.....	491
About the Web layer.....	491
Creating slices for interactivity	492
Creating rectangular slices.....	492
Resizing one or more slices.....	493
Viewing and selecting slices.....	493
Naming slices.....	494
Making slices interactive.....	494
Creating master pages.....	494
Linking the slices to your pages.....	497
Optimizing and exporting in Fireworks.....	497
Using Image Preview	498
Setting export options	499
Optimizing in the workspace	502
Saving optimization settings.....	504
Exporting selected slices	505
Self study.....	506
Review	506

Illustrator Lesson 1: Illustrator CC Essentials

Starting up	507
Using the shape tools	508
Repositioning and visually resizing the rectangle	510
Finding or changing the shape's dimensions using the Transform panel.....	511
Rotating and shearing using the Transform panel	512
Constraining a shape.....	513
Entering exact dimensions.....	514
Selecting artwork.....	516
Helpful keyboard shortcuts for selections.....	516
The selection tools	516
Using shape and transform tools to create artwork.....	521
Using the transform tools	521
Adding a fill color.....	523
Entering a shape size in the Transform panel.....	524
Viewing in Outline view.....	525
Rotating the shape.....	525
Changing the color of the triangles	527
Using layers when building an illustration.....	528
Creating a new blank layer.....	529
Cutting and pasting objects.....	529
Creating bubbles.....	531
Cloning the bubble group	532
Repeating a resize transform.....	533
Moving objects from one layer to another	535
Self study.....	536
Review	536

Illustrator Lesson 2: Adding Color

Starting up	537
Basics of the Appearance panel.....	538
Changing colors.....	539
Adding Effects	540
Creating a colorful illustration.....	542
Using Live Paint.....	542

Converting the artwork to a Live Paint group.....	545
Applying Live Paint to the group.....	545
Adding a symbol to your artwork.....	546
Expanding the symbol.....	549
Saving swatches.....	549
What is a Global Color?.....	551
Selecting the Same color.....	551
Saving a set of colors as a group.....	553
Creating a color group from selected colors.....	553
Using the Color panel.....	554
Adding Pantone (Spot) Colors.....	556
Adding Pantone colors.....	557
Taking advantage of the new and improved Kuler panel.....	559
Self study.....	562
Review.....	562

Illustrator Lesson 3: Working with the Drawing Tools

Starting up.....	563
Working with the Pen tool.....	564
Drawing straight lines.....	565
Drawing curved lines.....	567
Drawing hinged curves.....	568
Drawing curved lines to straight lines.....	570
Drawing straight lines to curved lines.....	572
Tracing images.....	573
Placing an image as a template.....	573
Placing an image using Image Trace.....	576
Working with the new Image Trace Method option.....	581
Other drawing tools.....	584
Using the Line Segment and Arc tools.....	584
Using the Pencil, Smooth, and Path Eraser tools.....	586
Using the Eraser tool.....	588
Editing existing paths.....	588
Adding and removing points.....	588
Refining a curve.....	590
Cutting and joining paths.....	591

Combining shapes using the Shape Builder tool.....	593
Combining the shapes.....	596
Subtracting with the Shape Builder tool	596
Creating the fish eyes	598
Self study.....	600
Review	600

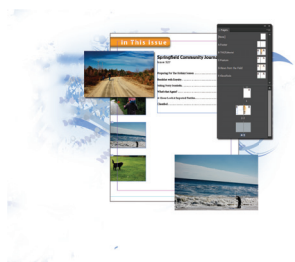

InDesign Lesson 1: InDesign CC Essential Skills

Starting up	601
InDesign tools.....	602
The InDesign workspace.....	603
The document window	603
Using guides.....	605
Viewing modes.....	606
Working with panels	607
The Tools panel.....	607
Managing panels	609
Saving your workspace.....	611
Working with the Control panel	612
Navigating through an InDesign document	613
Using the Pages panel	613
Changing the magnification of your document.....	614
Working with type	616
Entering and formatting type	616
Placing and formatting type	618
Flowing type.....	619
Using styles	620
Applying paragraph styles.....	621
Applying character styles	622
Apply styles across a story using Find/Change	622
Applying object styles	624
Working with graphics	626
Placing graphics.....	626
Positioning graphics within a frame	628
Applying text wrap	631
Understanding layers	632

Applying effects.....	634
Resources for additional help.....	635
DigitalClassroomBooks.com	635
In-product help.....	636
Online help.....	636
Forums.....	636
Conferences, seminars, and training.....	636
Self study.....	637
Review	637

InDesign Lesson 2: Working Smarter with Master Pages

Starting up	639
Planning your document.....	640
Creating custom page sizes.....	640
Creating a new custom-sized document.....	640
Creating and formatting master pages.....	643
Formatting master pages	645
Adding automatic page numbers.....	645
Using text variables.....	648
Basing master pages on other master pages.....	652
Overriding master page items.....	653
Adding layout pages	658
Placing formatted text.....	663
Creating the classified page.....	665
Adding images and text to the master frames.....	667
Applying master pages to multiple pages.....	669
Self study.....	670
Review	670

InDesign Lesson 3: Working with and Formatting Text

Starting up	671
Adding text to your document.....	672
Creating a text frame.....	672
Changing character attributes.....	674
Changing font and type styles using the new font search feature.....	674

Setting a font favorite.....	676
Adjusting size	676
Adjusting Leading.....	676
Adjusting character spacing: kerning and tracking	677
Using a baseline shift.....	678
Changing paragraph attributes.....	679
Horizontally aligning text	679
Changing the spacing before and after paragraphs.....	679
Using tabs.....	680
Adding rules above or below paragraphs.....	683
Changing text color.....	685
Creating drop caps	687
Finding and changing text.....	687
Finding and changing text and text attributes	687
Finding and changing text using GREP	690
Checking and correcting spelling	692
Checking spelling.....	693
Adding words to the dictionary.....	694
Checking spelling as you type.....	695
Automatically correcting spelling	696
Editing text using the Story Editor.....	698
