About the Author

Doug Lowe has written a whole bunch of computer books, including more than 40 For Dummies books, among them *Networking For Dummies*, 9th Edition, *Java All-in-One For Dummies*, 3rd Edition, *PowerPoint 2010 For Dummies*, and *Word 2010 All-in-One For Dummies*. He lives in sunny Fresno, California, where the motto is “Fres-YES!” (unfortunately, I’m not making that up). He’s one of those obsessive-compulsive decorating nuts who creates computer-controlled Halloween decorations that rival Disney’s Haunted Mansion.

To My Family.

Author's Acknowledgments

I'd like to thank everyone who was involved with the fourth edition of this book, especially the most excellent project editor Blair Pottenger, who put up with late submissions and who did a great job following through on all the little editorial details needed to put a book of this scope together on time. Thanks also to Dan DiNicolo, who gave the manuscript a thorough review to ensure the technical accuracy of every sentence, and in the process offered many excellent suggestions for improvements, and to copy editor Virginia Sanders, who whipped my prose into shape, crossing all the i's and dotting all the t's, or something like that. And, as always, thanks to all the behind-the-scenes people who chipped in with help I'm not even aware of.
